BANYAN AND AVIATION PARTNERS GROUP SEAL DEAL FOR COLLINS HF INSTALLATIONS

NBAA Orlando, FL - Banyan Air Service and Aviation Partners Group have teamed up to supply and install Collins HF-9000 High Frequency radio systems in 23 helicopters for an Eastern European client. This is the culmination of many months of effort by Boris Nekrasov, Mike Clayton and Gordon Carver from APG, and Paul Rose and Brian Wilson of Banyan Air Service.

“I am excited about this partnership with APG! This project is a result of our detailed focus on international clients and our growing relationship with the European market. It is also an honor to work with the professionals at APG.” says Paul Rose, Banyan’s VP of Technical Sales. The first two installations will begin in the next few months, with the subsequent aircraft to follow as equipment is delivered.

About Banyan Air Service: Based at Fort Lauderdale Executive Airport, Banyan’s avionics department has dedicated hangar space, a structural team, and technicians available for comprehensive avionics installations, repairs, and modifications. Banyan is recognized for top regional sales for Rockwell Collins, has earned FAA Diamond Awards, and is an authorized dealer for all major avionics manufacturers. Banyan is certified as both an FAA and EASA repair station and has also earned repair station designations for Argentina, Brazil and Venezuela. For more information on Banyan’s comprehensive aviation services, visit their website: www.banyanair.com

About APG-Eastern Avionics: Based in Punta Gorda, Florida, APG-Eastern Avionics is a global avionics company specializing in providing procurement solutions to the aviation community. The company sells, repairs, overhauls, installs, distributes and exports avionics and aviation instruments world-wide. Mobile Certs programs are also available in most SW Florida locations or at their Punta Gorda facilities.

APG-Eastern has 2 sister companies: NAS-Eastern and NEBO Services. NAS-Eastern provides the overhaul, repair, and installation services in their facilities conveniently located at the Punta Gorda Airport (PGD). NEBO Services, located in Russia, specializes in sales and distribution of avionics, as well as maintenance and inspection of fixed wing aircraft and helicopters. Together, APG-Eastern's "Power of Three" combines 26+ years of technical expertise, superior product knowledge, world-class customer service, and an impressive avionics supplier list for new and used avionics equipment.
