OCEAN GATE LAUNCHES NEW WEBSITE

Stuart, Florida – Ocean Gate General Contractors is pleased to announce the launch of its new user-friendly website, www.OceanGateGC.com, which details the company's extensive experience and solutions to client needs. Since the original website went live in 2001, Ocean Gate deemed it time to revamp the company's look and provide visitors with more helpful information. The new site features a comprehensive overview of the firm, its services, community involvement, green efforts, an extensive project portfolio and more.

President Mark MacDonald said, "The new website truly reflects Ocean Gate and how we are different from our competition. It highlights our construction expertise, our commitment to our clients, and our consistent ability to exceed expectations. This site enables potential clients to get a real sense of the Ocean Gate method to project success."

New key features of the site include client and subcontractor login capabilities. Ocean Gate patrons now have the ability to view documentation and photographs of their project's progression from beginning to completion. Project managers will create a username and password for the owner of the project that they are assigned and will consistently update information as it becomes available. Privacy is very important to Ocean Gate and protecting client information is a top priority. The firm has taken all precautions to ensure that project information made available to clients through the site

remains confidential. The new service enables Ocean Gate to further expand upon its client-first methodology by engaging clients through the website allowing for better and faster communication between the owner and the project manager.

The subcontractor login section of the site is currently underdevelopment for integration with new company software. It should be available for use in the near future. Once the new system is running, subcontractors will be able to create a username and password to gain access to current projects that Ocean Gate is bidding. Project plans can either be downloaded from the site or a subcontractor may request a printed version be mailed. This new feature stems from Ocean Gate's green initiative goals to reduce paper usage in the office.

Global Design, Inc. was responsible for the website transformation. They are a local award winning firm that develops websites, ecommerce, content management systems, and database solutions. For more information about Global Design call 772-288-2108 or go to www.globaldesign.biz.

With origins dating back to 1972 as Ocean Gate Builders, Ocean Gate General Contractors was founded in 2001 by President Mark MacDonald. The company facilitates new commercial construction for governmental, public and private sectors, and developments with a diverse clientele statewide. Ocean Gate's "client-first" methodology has led to a unique benefit of direct communication and streamlined building success, with a dedication to serve clients and the community for a higher standard of service. Ocean Gate General Contractors is centrally located at 2854 S.E. Federal Highway in Stuart. For more information, call 772-283-6744 or visit www.OceanGateGC.com.
